

# INDEPENDENTS WIN STATE SENATE

## LA FOLLETTE DEFEAT IN N. D. CONCEDED

### GRANT COUNTY FIGHT SWINGS RESULT TO INDEPENDENTS, WHO HAVE MAJORITY OF ONE VOTE

League Will Control the House, the Majority of That Faction Rising in the Late Returns, Leaguers Winning 62 Members of the Lower House—Little Chance That Victory of Fred Pathman as it Appears on Face of Returns Will be Overturned in Grant County

Fargo, Nov. 7.—(By the A. P.)—The Independent Republicans, the anti-Nonpartisan League faction, will remain in control of the North Dakota Senate during the next two years, while the House of Representatives, will be controlled by the League, it was definitely established at noon today when additional returns filtered in to the Associated Press tabulation headquarters at Fargo.

The unofficial returns which insured the Independents of their margin in the Senate came from Grant county where Fred Pathman took the lead from his League opponent, O. C. Gross by 50 votes with all except three precincts to be heard from. The vote 45 out of 48 precincts, Pathman 1,257; Gross 1,209.

The House of Representatives goes to the Nonpartisan League with the biggest margin that either faction in the Assembly has had since 1919, the Leaguers having elected 62 members of the lower branch while the Independents have only 51 members.

In the State Senate the Independents will have 25 members, obtaining this total through the election of 14 Senators in this week's elections, while the League will have 24 members and the presiding officer, the Lieutenant Governor of the state.

#### Majority of 50

The Grant county senatorship, returns show, will swing on a majority of about 50 for Pathman. The missing precincts are Faust, Wheeler and Howard which, on the basis of past performances, will come in with at least an even break for Pathman with the probability that he will add just a little to his majority.

In the 1921 recall, Frazier, League Governor, at the time carried the three missing precincts by a vote of 81 to 64, while in the 1922 Republican primary Governor Nestos carried the three precincts against the late B. F. Baker, 60 to 57.

The three precincts are far removed from Carlson, the county seat, the returns coming through a circuitous route, with the county auditor anticipating that the vote from Howard will become available tonight and the vote from Wheeler and Faust will not become available until tomorrow evening.

The Nonpartisan membership of the House was swelled by the determination of four contests that remained outstanding yesterday.

#### Gain in Dickey

In Dickey county, the League picked up one additional member, John Skogland, on the Republican ticket, with League endorsement, defeating John Gronbeck, Independent on the Democratic ticket.

In two contests in the 29th district in Ward county that were not settled yesterday the factions split, the Independents naming A. L. Fox while the Leaguers, named C. O. Carlson, the whole representation from the district being three Independents and one Leaguer.

Having accounted for 60 members up to 3 p. m. yesterday the settlement of these contests in their favor increased their probable vote to 62. The Independent candidate won the Wells county membership that was in doubt, but he has a margin of only two votes over William E. Hartl, so the official canvass will be required to finally and definitely settle this contest.

### Third Party Vote Estimated Over 4,000,000

New York, Nov. 7.—Announcement of Senator LaFollette that the independent movement must carry on coupled with the fact he is expected on the face of incomplete tabulations to have polled between 4,000,000 and 5,000,000 votes Tuesday has led to conjecture about potentialities of the third party which may be evolved under the leadership of the Wisconsin colon.

According to virtually complete returns LaFollette had a greater popular vote than Theodore Roosevelt in the historic three-cornered fight of 1912. The colonel won six states then whereas LaFollette apparently has won but one. Nevertheless, LaFollette ran second in 11 states and in three of these which Roosevelt won California, Minnesota, and South Dakota. LaFollette polled a slightly greater vote than Roosevelt did. The relative popular votes in these were as follows: California, Roosevelt 283,610, LaFollette 428,000; Minnesota, Roosevelt 125,856, LaFollette 290,000; South Dakota, Roosevelt 58,811, LaFollette 67,000. In the other three states that Roosevelt carried in 1912 and in all but one of which LaFollette ran second this year, their relative polls were as follows: Michigan, Roosevelt 214,583; LaFollette 105,000; Pennsylvania, Roosevelt 447,426; LaFollette 270,000; Washington, Roosevelt 113,693; LaFollette 106,000.

### WITH DOUBTFUL STATES NOW FOR COOLIDGE, MAJORITY IN CONGRESS APPEARS TO BE SAFE

Administration May Be Able to Control the New Congress in Spite of Obstruction From the LaFollette Forces. It Is Indicated on the Face of Returns Today—Republicans Have Good Majority Over Democrats in the House. One Socialist Wins For Congress

Washington, Nov. 7.—(By the A. P.)—As final returns from doubtful states and districts trickled in today, it appeared that President Coolidge had carried North Dakota and probably New Mexico and that the political lineup in the new Congress would be as follows: Senate, Republicans, 54; Democrats, 40; Farmer-Labor, one; vacancy one. (Continued.)

House—Republicans 246; Democrats 184; Farmer-Labor 3; Socialists 2.

At adjournment of Congress in June there were in the Senate 51 Republicans, 43 Democrats and two Farmer-Labor Senators and in the House 225 Republicans, 207 Democrats, one Socialist, one Farmer-Labor and one Independent.

In several Senatorial contests, notably the one in Iowa and in a half-dozen Congressional districts, the races were so close that recounts might alter the result.

Regardless of the outcome, however, the Republican organization in both the Senate and House seemed assured of a working majority with the LaFollette insurgents unable to get anywhere by forming a coalition with the Democrats. Included among the 34 Senators listed as Republicans are LaFollette and four others, Norris, Ladd, Frazier and Brookhart, who has been reelected on the face of unofficial returns, all of whom have consistently supported the Wisconsin Senator in Congress, but unless they receive aid from other Republicans who are inclined to vote independently they would be unable to trim the Republican vote below a bare majority of 49.

Magnus Johnson Loses  
Magnus Johnson, one of Minnesota's two Farmer-Labor Senators, last night conceded his defeat by Rep. Thomas D. Schall, a Republican, who as a member of the House has shown an inclination at times to vote independently. In New Mexico Senator Bursam, Republican, continued to trail his Democratic opponent, Sam G. Bratton, although President Coolidge retained a lead over John W. Davis, his nearest competitor. With a good share of the state's precincts still out, reelection of Rep. Morrow, Democrat, appeared probable but not certain. The last hope of LaFollette adherents of carrying a state in addition to Wisconsin went glimmering when Campaign Manager Vogel in North Dakota conceded that President Coolidge had won the state.

### SORLIE GLAD TO TAKE MILL

Grand Forks, N. D., Nov. 7.—"I wish to thank the people of North Dakota for being progressive enough to put the Mill and Elevator in the hands of the people who believe in it," Mr. Sorlie said when informed of his election.

"I hope to be able to put North Dakota and its industries in the hands of business people and to remove them as far as possible from politics and politicians," he concluded.

### FARM BUREAU TO REORGANIZE

Fargo, N. D., Nov. 7.—Reorganization of the North Dakota Farm Bureau was decided upon at a meeting of men representing the State Farm Bureau and the North Dakota Agricultural college held in Fargo, Tuesday.

At the session the reorganization was planned on a community basis and a subcommittee to arrange details was appointed consisting of W. L. Reed, chairman; Gordon Randlett, Pauline Reynolds, Mrs. Myrtle Gleason Cole, H. E. Rilling, E. A. Wilson, N. D. Gorman and Grace DeLong, representing the North Dakota Agricultural college.

### PRESIDENT SHOWS STRENGTH IN LATE RURAL PRECINCTS IN NORTH DAKOTA STATE VOTE

Victory of the President Over LaFollette Is Conceded By Manager of the LaFollette Campaign—President Leads By 8,000 With About 200 Precincts Not Heard From. Lead Which LaFollette Could Not Overcome

LATEST ON PRESIDENT  
Fargo, N. D., Nov. 7.—Returns from 2,011 precincts give Coolidge 91,919; LaFollette 84,417. In the last 10 precincts to report LaFollette increased his lead 372 and Coolidge increased his lead 272. This would indicate Coolidge would carry the state by between 6,500 and 7,000 votes.

CONCEDES ELECTION  
Frank A. Vogel of Coleharbor, LaFollette campaign manager in North Dakota, today conceded Coolidge's victory in North Dakota. Informed of the status of the race with 1,960 precincts reported Mr. Vogel said "LaFollette cannot overcome the lead."

"The Coolidge victory in North Dakota is simply a part of the Coolidge landslide," he said, "with the fact that there is a tendency upon the part of several thousand voters to vote the straight Republican ticket regardless of the candidates giving him a sufficient number of votes to capture this state."

Fargo, Nov. 7.—(By the A. P.)—Receiving an overwhelming plurality in the eastern sections of the state while he made a comparatively good showing in the avowed progressive strongholds in the central and western districts, President Coolidge, on the basis of unofficial returns from all but 220 precincts, captured the five North Dakota electoral votes in Tuesday's election.

When 1,960 of the state's 2,160 precincts had been tabulated early today the vote stood: Coolidge 90,705; LaFollette 82,499; Davis 15,453.

With President Coolidge's victory in North Dakota went the Wisconsin Senator's last hope of gaining any state electoral vote than Wisconsin. Senator LaFollette started what appeared to be a winning assault on the President's majority early Thursday afternoon but even to the surprise of the Coolidge leaders who expected Coolidge's lead to be cut with incoming returns from the west, the President rallied, and, in the last 26 precincts to report last night, was gaining about two votes per precinct on his opponent.

LaFollette, to overtake Coolidge, however, would have to average a 42 vote gain per precinct. The outstanding precincts are in rural western territory where LaFollette is expected to gain but county auditors in those districts say they doubt if there is an average of 42 precincts there.

League Victorious  
In the state race, however, the Nonpartisan League, which has been the chief supporter of LaFollette, emerged generally victorious. It elected a Governor, Lieutenant-Governor, Secretary of State, Treasurer, Insurance Commissioner and all three railroad commissioners. The anti-League faction, the Independents, elected an auditor, Attorney-General and Commissioner of Agriculture and Labor, unofficial returns indicated.

Republican Candidates Win  
Unofficial returns showed that every candidate for state office who received the Republican nomination in June was elected. The state's official family, for the next two years, will be: Governor—Arthur G. Sorlie, Grand Forks, League. Lieutenant-Governor—Walter Maddock, Plaza, League. Secretary of State—Robert Byrne, Argus, League. State Auditor—John Steen, Rugby, Independent. State Treasurer—C. A. Fisher, Valley City, League. Attorney-General—George Shafer, Watford City, Independent. Commissioner of Insurance—S. A. Olsness, Bismarck, League. Commissioner of Agriculture and Labor—J. A. Kitchen, Sentinel Butte, Independent. Commissioner of Railroads—Fay Harding, Linton; C. W. McDonald, Bismarck; Frank Milhollan, Bismarck, all League.

Tax Law Loses  
The only intimated measure up for vote, the tax law, which called for sharp reductions in state governmental expense, especially with reference to schools, appeared to have met defeat. With returns from 1,336 precincts the vote stood for 63,847; against 67,923. Incoming returns tended toward giving the opponents of the measure small gains.

Nielson Ahead  
Minnie J. Nielson also appeared to have been selected superintendent of public instruction, holding a lead of 6,314 votes with but 494 precincts to be heard from.

John Burke of Fargo, three times Governor of North Dakota on the Democratic platform, and former United States Treasurer, continued to pile up his overwhelming plurality over C. J. Fisk of Minot. Returns from 1,769 precincts in this contest gave Burke 86,064; Fisk 57,075.

Weather Report  
For Bismarck and vicinity: Mostly cloudy tonight and Saturday. Rising temperature Saturday.

For North Dakota: Mostly cloudy tonight and Saturday. Rising temperature Saturday and southeast portion tonight.

### GRANT COUNTY FIGHT SWINGS RESULT TO INDEPENDENTS, WHO HAVE MAJORITY OF ONE VOTE

League Will Control the House, the Majority of That Faction Rising in the Late Returns, Leaguers Winning 62 Members of the Lower House—Little Chance That Victory of Fred Pathman as it Appears on Face of Returns Will be Overturned in Grant County

Fargo, Nov. 7.—(By the A. P.)—The Independent Republicans, the anti-Nonpartisan League faction, will remain in control of the North Dakota Senate during the next two years, while the House of Representatives, will be controlled by the League, it was definitely established at noon today when additional returns filtered in to the Associated Press tabulation headquarters at Fargo.

The unofficial returns which insured the Independents of their margin in the Senate came from Grant county where Fred Pathman took the lead from his League opponent, O. C. Gross by 50 votes with all except three precincts to be heard from. The vote 45 out of 48 precincts, Pathman 1,257; Gross 1,209.

The House of Representatives goes to the Nonpartisan League with the biggest margin that either faction in the Assembly has had since 1919, the Leaguers having elected 62 members of the lower branch while the Independents have only 51 members.

### COOLIDGE HAS 83,000 LEAD IN MINNESOTA

Magnus Johnson Is Defeated By Schall and Christianson Is Governor

St. Paul, Nov. 7. (By the A. P.)—Checking of the unofficial returns coupled with the fact he is expected on the face of incomplete tabulations to have polled between 4,000,000 and 5,000,000 votes Tuesday has led to conjecture about potentialities of the third party which may be evolved under the leadership of the Wisconsin senator.

According to virtually complete returns LaFollette had a greater popular vote than Theodore Roosevelt in the historic three-cornered fight of 1912. The colonel won six states then whereas LaFollette apparently has won but one. Nevertheless, LaFollette ran second in 11 states and in three of these which Roosevelt won California, Minnesota, and South Dakota, LaFollette polled a slightly greater vote than Roosevelt did. The relative popular votes in these were as follows: California, Roosevelt 283,610, LaFollette 428,000; Minnesota, Roosevelt 125,856, LaFollette 230,000; South Dakota, Roosevelt 58,511, LaFollette 67,000. In the other three states that Roosevelt carried in 1912 and in all but one of which LaFollette ran second this year, their relative polls were as follows: Michigan, Roosevelt 214,583; LaFollette 105,000; Pennsylvania, Roosevelt 447,426; LaFollette 270,000; Washington, Roosevelt 113,698; LaFollette 106,000.

### Third Party Vote Estimated Over 4,000,000

New York, Nov. 7.—Announcement of Senator LaFollette that the independent movement must carry on the face of incomplete tabulations to have polled between 4,000,000 and 5,000,000 votes Tuesday has led to conjecture about potentialities of the third party which may be evolved under the leadership of the Wisconsin senator.

**HIGHWAY LAW CHANGES HELD TO BE NEEDED**

Highway Commission, in Annual Report, Points Out New Federal Requirements

**ASK GASOLINE TAX**

Also Increase of License Fees Urged to Create Purely State Fund

Changes in legislation providing for a state highway system in North Dakota must be made if the state is to continue to get federal aid, W. C. Black, chief engineer of the State Highway Commission, says in his annual report to the governor. The recommendations made by the Highway Commission's annual report are expected to come before the next legislature.

"One of the provisions imposed by federal legislation is that after a certain date, November 30, 1924, the state must match federal aid with funds wholly under the control of the State Highway Commission," the report of the Highway Commission reads. "Under our present state laws most of the funds necessary to meet federal aid are furnished from the road and bridge funds of the counties in which the improvements are to be made. Under this method it will be impossible to complete a state highway system for the reason that the poorer and more sparsely settled counties are unable to furnish the necessary funds with which to meet federal aid."

**Ask Gasoline Tax**

It is possible to create a state highway fund to equal with the federal law after November 30, 1924, without making a direct tax levy, Mr. Black says.

"By proceeding on the theory that those who use our main highways should pay for their construction this state will be able to raise a fund large enough to meet the state's allotment of federal aid funds each year," the report says. "This can be done by 1st—reducing our motor vehicle registration fees; 2nd, by providing a tax on gasoline or other motor fuel consumed in automobiles; exempting gasoline or other motor fuel used in stationary engines, farm tractors or any cleaning establishments and placing the money derived from such a tax where it belongs, in a highway fund."

Readjustment of motor vehicle fees is justifiable, it is declared, the commission holding that considering the amount of capital invested in automobiles they are not now taxed as heavily as other forms of property. The tax on gasoline, Mr. Black says, will give the users of the highways, whether residents or tourists, an opportunity to contribute their share of the cost of constructing and maintaining them.

**From County Funds**

At present, the report points out, most of the money required to meet the federal aid of approximately \$1,100,000 each year must come from county road and bridge funds, derived from general taxation. The only purely state highway funds available for expenditure by the commission now, the report says, are approximately \$200,000 yearly for construction and \$227,700 for maintenance from the motor vehicle fund, and \$120,000 to aid in building bridges over navigable streams.

Legislation looking to a better regulation of traffic on state roads is urged, including regulations affecting the overloaded motor truck, the tractor and threshing machinery with elevated wheels.

Under the plan of the United States Bureau of Public Roads, designating seven percent of the total mileage as a state highway system and eligible for federal aid, North Dakota would have 7,434.14 miles in a state system, the report says. The Bureau of Public Roads to date has

**URGES CHANGES TO STRENGTHEN N. D. TAX LAWS**

Tax Commissioner, in Annual Reports, Makes Several Recommendations

**FOR MORE VETO POWER**

Would Give Governor Authority to Veto Individual Items in Bills

Suggestions for numerous changes in the state tax laws, to be considered by the legislature, are advanced by Tax Commissioner L. C. Converse in his biennial report.

Among the questions which he suggests be considered by the legislature are:

Providing that land owners and owners of real estate mortgages, in order to save property from loss, may pay taxes upon part of a real estate tract.

Clarifying of the duties of the county board of equalization; clarifying the statutory provisions with reference to placing upon the tax list property which has escaped assessment.

Consideration of obsolete laws, such as requiring appraisal of property exempt from taxation, and

**Veto Necessary**  
The gubernatorial veto is necessary

making it the duty of the assessor to collect military statistics.

Clarifying the laws regarding tax judgment sales; regarding the situs of personal property; abolition of tax supervisors, who have not been found helpful by taxing boards.

Provision for traveling auditors of income tax returns. Under present laws, the tax commissioner has little power to detect a considerable amount of evasion in connection with the income tax.

**Poll Tax Law**

The poll tax law fails of its object to a considerable extent because there is no adequate provision for its collection in instances where the taxpayer does not have a substantial amount of tangible property, and provision should be made for collection of the tax.

Revision of the law requiring assessment of real estate, perhaps providing for assessment once each four years.

Amendment of the constitution to make more effective the gubernatorial veto over appropriations.

"In order to make the veto power of the governor effective in such situations where excessive local appropriations are made," it is suggested that the constitution be so amended as to give him the power either to disapprove or to reduce any item of an appropriation bill," says the report.

"As the constitution now stands, he has the power to disapprove of any item, but he does not have the power to reduce it; he must either disapprove it in toto or approve it. It is because of the fact that he does not have the power to reduce an item without disapproving its entirety that this constitutional provision loses much of the effectiveness which its authors designed it to have."

**Veto Necessary**  
The gubernatorial veto is necessary

to counter-act appropriations made as a result of "log-rolling," the tax commissioner says.

Observation of the deliberation of legislative assemblies leads to the conclusion that often the fact that appropriations are made which are not justified by considerations of economy and wise care for the public treasury is not due to any lack of wisdom or lack of desire for economy on the part of individual legislators," says the report.

"On the contrary, legislators invariably find themselves victims of the practice commonly known as 'log-rolling.' That is another name for trading votes and is practiced, to some extent, in all law-making bodies. The practice is not nearly as prevalent in our legislature as it is in Congress. Nevertheless, at each session appropriations are made which do not commend themselves to the judgment of legislators who vote for them."

The practice often comes because legislatures are pressed by time to get a particular appropriation for some institution, Mr. Converse says, holding they are not to be criticized alone for such appropriations.

**OAKLAND SPEEDS UP PRODUCTION**

Pontiac, Mich., Nov. 5. Due to the heavy demand for the new Oakland Landau Sedan, which has far surpassed the expectations of factory officials, production has been trebled on this model since it was introduced a few months ago.

This increase is remarkable in view of the fact that the original schedule was carefully based on past selling experience and intimate knowledge of the market, and was considered, at the time, to be extremely large.

One of the reasons ascribed by Oakland dealers for the popularity of this model is that it meets the requirements of a very desirable class of buyers already owning high priced cars, who wish a second car that reflects their tastes in beauty of line, refinement and appointments.

The Landau Sedan, although the highest priced model in the Oakland line, is leading all other types in sales, including the touring car, which is next in popularity.

There are 75,000 taxicabs in the United States.

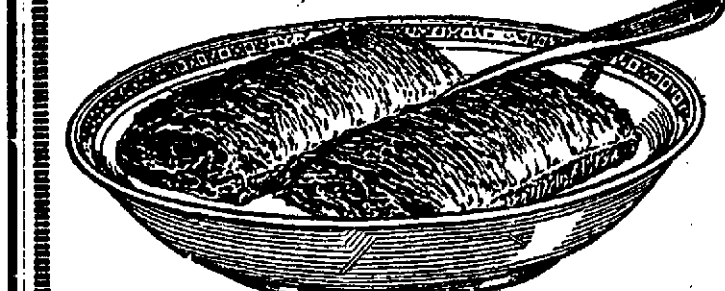

**Few Children in Vienna Schools**

Vienna, Nov. 6. The havoc wrought by the war in the birth rate in Austria is brought out forcibly in figures issued by the city school authorities of Vienna, showing 100,000 fewer children inscribed in elementary schools for the autumn term this year than in 1914.

2. The United States Inspection label on all of this company's products is an absolute guarantee that every piece of meat is sound, wholesome and healthful, and that it was prepared under the most sanitary conditions. Look for this label: "U. S. Inspected and Passed. Establishment 969."

3. This is a Northwestern corporation, with more than 1,500 stockholders who reside and earn their living in the Northwest. They are your neighbors and they will appreciate your patronage. Also, this company provides an excellent market for the livestock grown in the Northwest and encourages the growing of more and better livestock, which means greater prosperity for Northwestern farmers. A large percentage of the money received for meat products is paid out to the farmers for livestock, which contributes to their prosperity and indirectly benefits every citizen of this great Northwestern empire.

Those three reasons should influence you to insist upon getting Northern Packing company's products whenever you order meats.

# NATIONAL CANNED FOODS WEEK

## NOVEMBER 8th -- 15th

Haphazard day to day shopping takes time and costs money. Besides it brings no end of inconvenience and worry. "Some time" many a homemaker has said to herself, "I'll sit-down and plan my buying all out ahead, and then something will not always be turning up to spoil my day."

Because thousands of homemakers do plan ahead, and because this is the time when they can buy to best advantage, November 8th to 15th has been set apart as Canned Foods Week.

Grocers the country over have laid in abundant stocks and are prepared to help the buyer who wants to **SAVE MONEY**. They will assist you to choose from 200 varieties of canned foods the kinds that will make the winter's meals both appetizing and nourishing. They will show you how to make substantial savings by purchasing by the dozen or in case lots, (two dozen.) Appetizing, wholesome food will thus be at your service the year round.

Canned Foods Week begins November 8th. Right now you should be making your plans for the months to come—counting up what you will need—so you can ask your grocer how much you can save by quantity purchases.

# CANNED FOODS WEEK IS YOUR OPPORTUNITY

## BUY IN QUANTITIES

This week housewives can learn from grocers how to avoid needless work and how to save money. Let Your Grocer show you how to plan your buying.

Because canned foods are used every day in most homes, many housewives do little planning in their buying. They make one-can-at-a-time purchases or perhaps just enough to meet the needs when unexpected guests arrive. Learn the advantage of planning and buying ahead.

**Convenience** Because full pantry shelves mean freedom from worry in winter days when meal planning is a real problem; because they save many a tiresome trip to the grocer when other household duties press upon the busy housewife; because they make the entertainment of unexpected guests a pleasure.

**ECONOMY** Because grocers are offering, during National Canned Foods Week, special prices to those who purchase in quantity lots. Real substantial savings await those who take advantage of the opportunities this week offers. Call on your grocer now and let him show you the advantages of buying your canned foods in quantity lots.

THE STATE'S OLDEST NEWSPAPER  
(Established 1873)

MILLIONAIRE  
To have an income of \$50,000 a year, one must be a millionaire or have an earning power equivalent to a million dollars invested at 5 per cent interest.

Each \$1000 of income a year is the same as 5 per cent earnings on \$20,000 cash. On this basis, how much are you actually "worth"? A highly valuable machine, the human body with its brain.

How many millionaires in America? On the basis of the number of incomes this big or larger, reported in income taxes, the country had 18,837 millionaires in 1919 and only 16,031 in 1922. It's impossible to estimate how many others have huge incomes but manage partly to conceal them in tax returns.

JOY  
The thirsty cynic will agree that of all sad words of tongue or pen the saddest are these, by Henri Chausson of Bacardi Rum Co.:  
"I have some Bacardi rum that is 50 years old. It is worth a king's ransom and was distilled by the original Emilio Bacardi, a great artist in this field. It is a trial for me to keep it. I am offered fortunes for it. Yet I still hold to it. I shall hold to it. When my heart is sad and lonely, I go to the cave and inhale the fragrant aroma of the half-century-old priceless rum and feel at peace with the world." Fetch a doctor! An Old Soak has just fainted.

JAY-WALKERS  
A safety-first official in New York defends jay-walking. He says arresting a jay-walker is trespassing on liberty. "The pedestrian has the right to the highways, whereas it is only a privilege for vehicular traffic to operate upon the highways."  
This is ridiculous. A pedestrian's rights, if we are going to be practical, are limited to sidewalks from which autos are barred and crossings where streets intersect. He has no more business on the pavement between crossings than he has on railroad tracks. Trespassing, he invites accident.

SCOPOLAMIN  
The "truth serum" (scopolamin-apomorphia) is a success, it's claimed at convention of Eastern Society of Anesthetists. This drug, to make people tell the truth whether they want to or not, is a humane form of third-degree.  
After reading the list of income taxes paid by some of America's presumably rich men, we suggest that scopolamin be administered before swearing to the truthfulness of an income tax report. That is not beyond possibility.

INTOXICATING  
How much alcohol makes a beverage intoxicating? Any step to "ease" the prohibition regulations will hinge on this question. Possibly a scientific clinic will result, to test the effects of liquor on people. Conscription would hardly be necessary.  
Intoxication depends on the drinker. A hyper-thyroid person, virtually immune to stimulants, gets less kick out of a whole pint of brandy than the average man out of two drinks.

DISCOVERED  
A St. Louis mechanic, James Earl Cummings, claims he has discovered the long-lost art of hardening and tempering copper. Ancient Egyptians were masters at it. Cummings says he has sold his discovery for a million and a half cash.  
He is 33 and confides that he hit upon the process, sought by graybeards for centuries, by sheer accident.  
For that matter, the majority of big discoveries are made by "accident"—though usually during the course of long research and patient work.  
Man blunders into a huge part of his progress.

PERMANENT BUILDINGS  
Public buildings, though they are comparatively used very little, are built as if intended to last forever. We haven't gotten away from aping the Pharaohs who built the pyramids. Our postoffices and other public structures are primarily monumental. They have the spirit of the graveyard rather than of utility.  
Unbearable tax burden may compel a change, as it already has in erecting cheap shacks for schools—temporary, to be true, but quite as efficient as imitations of Roman and Grecian architecture.

FATHER OF SNAKES  
A Texas lizard that lived 25 million years ago was the "father of all snakes," a scientist claims. He says it took 10 million years for the lizard to become a snake by getting rid of its legs, most of its bones and a third eye on the top of its head.  
Evolution is very slow, whether it is political, economic or of the physical body. Many economic problems, which vex us because they persist generation after generation despite efforts to solve them, are really phases of slow evolution.

SUBMARINE  
Have you read about Uncle Sam's biggest submarine boat, recently launched? It's the V-1, first of a fleet of nine. Length, over 341 feet. Crew, seven officers and 80 subordinates. Speed, 21 knots an hour on the surface, nine knots submerged.  
We should have at least 200 of these craft. Remember our thousands of miles of coastline to be guarded.

BANKS  
To clear up a lot of misinformation used in arguments: The government reports that in 1923 about 14 per cent of American railroad bonds were owned by banks and trust companies.

## ADVENTURE OF THE TWINS

BY OLIVE ROBERTS BARTON

## WHAT THE KING'S COOK DID IN THE SKY

The cook of the King of Yum Yum Land stopped being frightened when the magic dust-pan ran off with him to the sky, and he began to look around.

"Well, well, well," he said to himself. "For the first time in my life I am seeing the world. And as I have the magic fork I am in a fair way to make my fortune. I can stay in a hotel and I won't have to cook as much as an egg. I can stay in bed all day and just wave my fork and provide food for a hundred guests."

But then it occurred to him that there he was up in the sky with no idea of how to get down.

All at once he saw a wonderful sight.

Right ahead of him sitting comfortably on a big cloud, was a nice little house with a red tile roof and a red chimney and nice green shutters and a cute front porch and everything. The cook didn't know that it was the House-That-Jack-Built.

"Well, of all things!" he cried. "What is that funny stuff sticking out of the windows? It looks exactly as though part of the cloud had gotten inside and was poking through."

But pretty soon the dust-pan brought him near enough to see what the stuff really was. You know what it was, of course. Mrs. John's bread dough that had raised until it got so big and so light that it had lifted the little house right off its foundation and carried it up to the sky.

But the cook couldn't make it out until he was close up.

"Why it's bread dough, as sure as you're born!" he declared. "Nice sweet, light bread dough! I wonder how it got here and whose it is."

He gave a little jab with the magic fork at a great bulge piece that was sticking out of one of the windows, and poof! puff! whuff!

The air went out of the bread dough like a punctured balloon, and the dough settled back in its pan on the table as though it had never had a thought of leaving. Except for a little flour dust on the ceiling, and a patch on the stove, and a smudge on the kitchen as clean as apple pie for Mrs. John was a good housekeeper.

"Doughnuts and gingerbread!" cried the cook. "If queer things keep on happening I'll begin to think I have wheels in my head. I hardly know whether to believe in my good luck or not. A magic fork to provide food and a fine house to live in, in my old age. I'll just go inside."

So he opened the little brown door and stepped off the magic dust-pan and went in.

Instantly the magic dust-pan started to fall toward the earth.

It dropped down like a stone.

But it never reached the ground.

Nancy and Nick and Daddy Gander were still floating around in the air with no place to go. The peddler's floating powders were very strong and lasted a long time.

As the magic dust-pan passed Daddy Gander's ring in the handle caught in a button of the old gentleman's green coat and hung there.

"Great growing broom-corn!" cried Daddy, grabbing it with both hands. "If it isn't my dearly beloved dust-pan! Look here, Twins. We're saved."

The minute he touched it, the pan spread out like a magic carpet, and in about two minutes the three adventurers were sitting on it as safely as the Thief of Bagdad on the magic carpet.

## IT'S YOUR BIRTHDAY

FRIDAY, NOV. 7.—You are hardly as practical as you should be for your own success. Money will always elude you for you have not learned how to save the little sums.

A deep and lasting affection is likely to work harm for you unless you are careful that you do not lavish it on someone unworthy of your love.

You are clever, literary and of an inquiring turn of mind, yet you believe too easily and are apt to be imposed upon.

There is a vein of humor in your make-up which will be admired if you are careful not to become caustic or cutting in your remarks.

LETTER FROM SYDNEY CARTON TO JOHN ALDEN PRESCOTT

Dear Jack: You must have thought it very strange that I have not in some way acknowledged the receipt of your two last letters or the wire announcing the death of Mr. Hamilton. I have been up at Gordon Phillips' hunting lodge in the Adirondacks for the last two weeks and you know how far that is away from the outside world.

I told my secretary this morning I left to wire you where I had gone but in the rush she forgot it. You see, my secretary is not as perfect as Mrs. Atherton.

I arrived home this morning and found your long letters and wire. You know, old man, if I had been home I would have been with you through all this trying time, for out-ward I have always had for Mr. Hamilton, my friendship for you and Leslie would have made me feel that I must do something to lighten your load.

I read your last long letter over very carefully. It seems to me that you have the great opportunity as well as the great responsibility of your life. Mr. Hamilton has placed a huge load on your shoulders and I am really sorry for you, man, instead of glad, because this magnificent business which he has left in your care will claim the best years of your life.

The next ten years at least all your waking hours and probably some that should be given to sleep will be filled with work of brain and hands.

Even though daily production of tires in Akron has reached 70,000, no puncture shortage is reported.

## FABLES ON HEALTH GUARD AGAINST IT

"The trouble with a lot of parents is that they try so hard to protect their children from some of the hardships they themselves went through that the kids never really get initiated into life."

This was what the family doctor pointed out to Mr. Jones of Anytown one day when they were talking about children and parents.

There is a great tendency upon the part of parents who have had a hard time of it in youth to throw too much of a fence about their offspring. So carefully guarded are many of these children that they have no opportunity to engage in the ordinary play so necessary to youth. This is a grave mistake and one that will result more or less seriously.

so tedious that you will only be a galley slave tied to the oars of the great god—Money. I am almost sure that you will be a success in this business, although you say that you know little about it.

I wish I were as sure you were going to be happy. I wish I were as sure that you were going to make the life happy. It will take a strong man, Jack, to keep the proper balance between your soul and your overweening ambition to become a financial power. It will take a stout heart to keep you from growing more self-contained and selfish, from thinking that you are of greater importance in your business than you are in your home. God grant that you may be that strong man.

Yes, I know that I am always a critic and a croaker and that is why I will never be a rich man. Some way I always have to sit on the sidelines and analyze the plays that are made in the game of life by my friends, even though I cannot play the game as well as they do.

The whole world, Jack, that is your little world, when it hears that you are going to take over this great business, will consider you the luckiest man in all the world but I know you a long time ago when you married Leslie Hamilton that this was true. I can't understand why it is that you yourself have not come to this conclusion long ago.

But for all that I confess that I was called to step into the shoes of a man such as Joseph Grace Hamilton.

## JOINT-EASE FOR Stiff, Swollen Joints Rheumatic or Otherwise

Says: "When Joint-Ease Gets In—Joint Agony Gets Out"

It was a high-class pharmacist who saw prescription after prescription fail to help hundreds of his customers to get rid of rheumatic swellings and stiff inflamed joints.

And it was this same man who asserted that a remedy could and would be compounded that would make creaky, swollen, tormented joints work with just as much smoothness as they ever did.

Now this prescription, rightly named Joint-Ease, after being tested successfully on many obstinate cases, is offered through progressive pharmacists to the millions of people who suffer from inflamed joints that need limbering up.

Swollen, twinges, inflamed, stiff, pain-tormented joints are usually caused by rheumatism, but whatever the cause Joint-Ease soaks right in through skin and flesh and gets right to and corrects the trouble at its source.

Remember Joint-Ease is for ailments of the joints, whether in ankle, knee, hip, elbow, shoulder, spine or finger, and when you rub it on, you may expect speedy and gratifying results.

It is now on sale at druggists everywhere for 60 cents a tube. Always remember, when Joint-Ease gets in joint agony gets out—quick.

## Chlorine Gas Heals Sore Gums

The reports of the U. S. army surgeons on the curative value of Chlorine Gas in certain diseases read like modern miracles. Out of over a thousand mixed cases 70 per cent cures are reported.

It is gratifying to find that Chlorine Gas is now available to any person in his home. The gas is combined with other valuable healing agents in a liquid form and has been named Jo-Vex.

Most important of all, it has been found that this new product, Jo-Vex stops the treacherous gum disease known as Pyorrhea which is usually accompanied by sore and bleeding gums, loose teeth, etc., and which results in broken health and false teeth unless mastered.

Druggists are ordering Jo-Vex for local distribution. Finney's Drug Store has just received fresh shipments direct from the laboratory. If your druggist's supply is exhausted The Jo-Vex Chemical Co., Akron, Ohio, will send a full size bottle with complete instructions upon receipt of \$1.00.

Delphians Hold  
Meeting This  
Morning

Delphian Chapter met this morning at 9:30 in the club room of the McKenzie Hotel for their regular program. Mrs. Ritterbush, as leader made an excellent exposition of the Renaissance period in Drama. Dr. Fannie Dunn Quinn showed how "The Commedia dell'Arte" influenced the then awakening consciousness of the people in self-expression. Sir Thomas Moore's "Interlude" was discussed in round table, the point being brought out that the "Interlude" introduced the drama to the inside arrangement of housing, and was the beginning of the stage with setting. Mrs. Breslow reported on John Heywood's "The Four Ps" and discussed the place of the spoken burlesque, antedating the story used by Bunyan in his writings. The Maque was described from Scott's "Kenilworth" describing the masque presented by local talent in honor of the visit of Queen Elizabeth to Kenilworth Castle. Moore's "The Shepherd" was read.

with the cast of characters taken by Mrs. J. C. Taylor, Mrs. Ebert, Mrs. Davis, Mrs. Janssonius, Mrs. Moody, and Mrs. Peimer.

It has been voted that the next regular meeting of the Chapter include a luncheon to be given in the dining room of the McKenzie Hotel at one o'clock, when all members, active and otherwise, will make reservations for places at table. A committee on arrangements for the luncheon has been named. A short program will precede the luncheon, the club deciding to take the hour of twelve to one, in place of the established hour of 9:30, in order to accommodate members attending the luncheon.

(Established 1873)

**MILLIONAIRE**  
To have an income of \$50,000 a year, one must be a millionaire or have an earning power equivalent to a million dollars invested at 5 per cent interest.  
Each \$1000 of income a year is the same as 5 per cent earnings on \$20,000 cash. On this basis, how much are you actually "worth"? A highly valuable machine, the human body with its brain.  
How many millionaires in America? On the basis of the number of incomes this big or larger, reported in income taxes, the country had 18,837 millionaires in 1919 and only 16,031 in 1922. It's impossible to estimate how many others have huge incomes but manage partly to conceal them in tax returns.

**JOY**  
The thirsty enviously will agree that of all sad words of tongue or pen the saddest are these, by Henri Chausson of Baccardi Rum Co.:  
"I have some Baccardi rum that is 50 years old. It is worth a king's ransom and was distilled by the original Emilio Baccardi, a great artist in this field. It is a trial for me to keep it. I am offered fortunes for it. Yet I still hold to it. I shall hold to it. When my heart is sad and lonely, I go to the cave and inhale the fragrant aroma of the half-century-old priceless rum and feel at peace with the world."  
Fetch a doctor! An Old Soak has just fainted.

**JAY-WALKERS**  
A safety-first official in New York defends jay-walking. He says arresting a jay-walker is trespassing on liberty. "The pedestrian has the right to the highways, whereas it is only a privilege for vehicular traffic to operate upon the highways."  
This is ridiculous. A pedestrian's rights, if we are going to be practical, are limited to sidewalks from which autos are barred and crossings where streets intersect. He has no more business on the pavement between crossings than he has on railroad tracks. Trespassing, he invites accident.

**SCOPOLAMIN**  
The "truth serum" (scopolamin-apomorphia) is a success, it's claimed at convention of Eastern Society of Anesthetists. This drug, to make people tell the truth whether they want to or not, is a humane form of third-degree.  
After reading the list of income taxes paid by some of America's presumably rich men, we suggest that scopolamin be administered before swearing to the truthfulness of an income tax report. That is not beyond possibility.

**INTOXICATING**  
How much alcohol makes a beverage intoxicating? Any step to "ease" the prohibition regulations will hinge on this question. Possibly a scientific clinic will result, to test the effects of liquor on people. Consumption would hardly be necessary.  
Intoxication depends on the drinker. A hyper-thyroid person, virtually immune to stimulants, gets less kick out of a whole pint of brandy than the average man out of two drinks.

**DISCOVERED**  
A St. Louis mechanic, James Earl Cummings, claims he has discovered the long-lost art of hardening and tempering copper. Ancient Egyptians were masters at it. Cummings says he has sold his discovery for a million and a half cash.  
He is 33 and confides that he hit upon the process, sought by graybeards for centuries, by sheer accident.  
For that matter, the majority of big discoveries are made by "accident"—though usually during the course of long search and patient work.  
Man blunders into a huge part of his progress.

**PERMANENT BUILDINGS**  
Public buildings, though they are comparatively used very little, are built as if intended to last forever. We haven't gotten away from aping the Pharaohs who built the pyramids. Our postoffices and other public structures are primarily monumental. They have the spirit of the grave yard rather than of utility.  
Unbearable tax burden may compel a change, as it already has in erecting cheap shacks for schools—temporary, to be true, but quite as efficient as imitations of Roman and Grecian architecture.

**FATHER OF SNAKES**  
A Texas lizard that lived 25 million years ago was the "father of all snakes," a scientist claims. He says it took 10 million years for the lizard to become a snake by getting rid of its legs, most of its bones and a third eye on the top of its head.  
Evolution is very slow, whether it is political, economic or of the physical body. Many economic problems, which vex us because they persist generation after generation despite efforts to solve them, are really phases of slow evolution.

**SUBMARINE**  
Have you read about Uncle Sam's biggest submarine boat, recently launched? It's the V-1, first of a fleet of nine. Length, over 341 feet. Crew, seven officers and 80 subordinates. Speed, 21 knots an hour on the surface, nine knots submerged.  
We should have at least 200 of these craft. Remember our thousands of miles of coastline to be guarded.  
**BANKS**  
To clear up a lot of misinformation used in arguments: The government reports that in 1923 about 14 per cent of American railroad bonds were owned by banks and trust companies.

**ADVENTURE OF THE TWINS**  
BY OLIVE ROBERTS BARTON  
**WHAT THE KING'S COOK DID IN THE SKY**  
The cook of the King of Yum Yum Land stopped being frightened when the magic dust-pan ran off with him to the sky, and he began to look around.  
"Well, well, well," he said to himself. "For the first time in my life I am seeing the world. And as I have the magic fork I am in a fair way to make my fortune. I can stay in a hotel and I won't have to cook as much as an egg. I can stay in bed all day and just have my fork and provide food for a hundred guests."  
But then it occurred to him that there he was up in the sky with no idea of how to get down.  
All at once he saw a wonderful sight.  
Right ahead of him sitting comfortably on a big cloud, was a nice little house with a red tile roof and a red chimney and nice green shutters and a cute front porch and everything. The cook didn't know that it was the House-That-Jack-Built.  
"Well, of all things!" he cried. "What is that funny stuff sticking out of the windows? It looks exactly as though part of the cloud had gotten inside and was poking through."  
But pretty soon the dust-pan brought him near enough to see what the stuff really was. You know what it was, of course, Mrs. John's bread dough that had raised until it got so big and so light that it had lifted the little house right off its foundation and carried it up to the sky.  
But the cook couldn't make it out until he was close up.  
"Why it's bread dough, as sure as you're born!" he declared. "Nice sweet, light bread dough! I wonder how it got here and whose it is."  
He gave a little jab with the magic fork at a great bulgy piece that was sticking out of one of the windows, and poof! poof! poof!  
The air went out of the bread dough like a punctured balloon, and the dough settled back in its pan on the table as though it had never had a thought of leaving. Except for a little flour dust on the ceiling, and a patch on the stove, and a smudge on the door, the kitchen was as clean as apple pie, for Mrs. John was a good housekeeper.  
"Doughnuts and gingerbread!" cried the cook. "If queer things keep on happening I'll begin to think I have wheels in my head. I hardly know whether to believe in my good luck or not. A magic fork to provide food and a fine house to live in, in my old age. I'll just go inside."  
So he opened the little brown door and stepped off the magic dust-pan and went in.  
Instantly the magic dust-pan started to fly toward the earth.  
It dropped down like a stone.  
But it never reached the ground. Nancy and Nick and Daddy Gander were still floating around in the air with no place to go. The peddler's floating powders were very strong and lasted a long time.  
As the magic dust-pan passed Daddy Gander, the ring in the handle caught in a button of the old gentleman's green coat and hung there.  
"Grown! growing! blossoming!" cried Daddy, grabbing it with both hands. "If it isn't my dearly beloved dust-pan! Look here, Twins. We're saved."  
The minute he touched it, the pan spread out like a magic carpet, and in about two minutes the three adventurers were sitting on it as safely as the Thief of Baghdad on the magic carpet.

**JOINT-EASE FOR Stiff, Swollen Joints**  
Rheumatic or Otherwise  
Says: "When Joint-Ease Gets In—Joint Agony Gets Out!"  
It was a high-class pharmacist who saw prescription after prescription fail to bring hundreds of his customers to get rid of rheumatic swellings and stiff inflamed joints.  
And it was this same man who asserted that a remedy could and would be compounded that would make creaky, swollen, tormented joints work with just as much "smoothness" as they ever did.  
Now this prescription, rightly named Joint-Ease, after being tested successfully on many obstinate cases, is offered through progressive pharmacists to the millions of people who suffer from ailing joints that need limbering up.  
Swollen, twinging, inflamed, stiff, pain-tormented joints are usually caused by rheumatism, but whatever the cause Joint-Ease soaks right in through skin and flesh and gets right to work and corrects the trouble at its source.  
Remember Joint-Ease is for all aches of the joints, whether in ankle, knee, hip, elbow, shoulder, spine or finger, and when you rub it on, you may expect speedy and gratifying results.  
It is now on sale at druggists everywhere for 60 cents a tube.  
Always remember, when Joint-Ease gets in joint agony gets out—quick.

**IS THIS Your BIRTHDAY**  
FRIDAY, NOV. 7. You are hardly as practical as you should be for your own success. Money will always elude you for you have not learned how to save the little sums. A deep and lasting affection is likely to work harm for you unless you are careful that you do not lavish it on someone unworthy of your love.  
You are clever, literary and of an inquiring turn of mind, yet you believe too easily and are apt to be imposed upon.  
There is a vein of humor in your make-up which will be admired if you are careful not to become caustic or cutting in your remarks.

**FABLES ON HEALTH—GUARD AGAINST IT**  
"The trouble with a lot of parents is that they try so hard to protect their children from some of the hardships, they themselves went through that the kids never really get initiated into life."  
This was what the family doctor pointed out to Mr. Jones of Anytown one day when they were talking about children and parents.  
There is a great tendency upon the part of parents who have had a hard time of it in youth to throw too much of a fence about their offspring. So carefully guarded are many of these children that they have no opportunity to engage in the ordinary play so necessary to youth. This is a grave mistake and one that will result more or less seriously.  
The parents were, in all probability, reared on plain food. But not for their youngsters! The second generation finds his platter surrounded with the great varieties of food made possible by present day shipping conditions.  
And yet many wonder why the children do not grow up to be as sturdy as the parents. The answer is simple: too much indulgence! Guard against this.

**Chlorine Gas Heals Sore Gums**  
The reports of the U. S. army surgeons on the curative value of Chlorine Gas in certain diseases read like modern miracles. Out of over a thousand mixed cases 70 percent cures are reported.  
It is gratifying to find that Chlorine Gas is now available to any person in his home. The gas is combined with other valuable healing agents in a liquid form and has been named Jo-Vex.  
Most important of all, it has been found that this new product, Jo-Vex stops the treacherous gum disease known as Pyorrhea which is usually accompanied by sore and bleeding gums, loose teeth, etc., and which results in broken health and false teeth unless mastered.  
Druggists are ordering Jo-Vex for local distribution. Finney's Drug Store has just received fresh shipments direct from the laboratory. If your druggist's supply is exhausted The Jo-Vex Chemical Co., Akron, Ohio, will send a full size bottle with complete instructions upon receipt of \$1.00.

Mrs. Ross, it is understood, will be inaugurated before Mrs. Ferguson but friends of the Texas Governor-elect retained for her the honor of being "first" because her candidacy was carried through three bitter campaigns.

If you want to watch Tom Mix hit the mark see him in "The Trouble Shooter," the new Fox picture in which the western star is playing at the Capitol theatre. He rides that dare-devil little horse, Tony, across a swaying trestle with a speeding locomotive coming up behind him. He takes the heavy animal through a mountain storm on "horse showboots." Never heard of them? Well, Mix invented them and Tony's "on."

Thomas Meighan's smiling face is being seen at the Eltinge theatre today and Saturday in "The Contingent Man." The story is one of a small town where Meighan, as Dan Corvan, goes to get a wealthy old gentleman interested in a fake oil stock deal.

Virginia Valli plays opposite the star, and Laurence Wheat, Charles Bow Clarke and others are in the cast.

At The Movies

AT THE CAPITOL If you want to watch Tom Mix hit the mark see him in "The Trouble Shooter," the new Fox picture in which the western star is playing at the Capitol theatre. He rides that dare-devil little horse, Tony, across a swaying trestle with a speeding locomotive coming up behind. He takes the nifty animal through a mountain storm on "horse showboots." Never heard of them? Well, Mix invented them and Tony wears 'em.

THE ELTINGE Thomas Meighan's smiling face is being seen at the Eltinge theatre today and Saturday in "The Confidence Man." The story is one of a small town where Meighan, as Dan Corvan, goes to get a wealthy old gent interested in a fake oil stock deal.

Virginia Valli plays opposite the star, and Laurence Wheat, Charles Dow Clarke and others are in the cast.

## You Poor Kid, Why Are You So Skinny?

Don't your mother know that Cod Liver Oil will put pounds of good healthy flesh on your bones in just a few weeks?

Tell her every druggist has it in sugar-coated tablet form now so that you won't have to take the nasty, fishy-tasting oil that is apt to upset the stomach.

Tell her that McCoy's Cod Liver Oil Tablets are chock-full of vitamins and are the greatest flesh producers and health builders she can find.

One sickly, thin kid, aged 9, gained 12 pounds in 7 months.

She must ask a good druggist for McCoy's Cod Liver Oil Tablets—60 tablets, 60 cents—as pleasant to take as candy.

"Get McCoy's, the original and genuine Cod Liver Oil Tablet."

Temple, Texas Nov 7 By the A.

To Mrs. Ferguson, wife of former Governor James E. Ferguson, apparently had come the peculiar distinction with Mrs. Nellie Taylor Ross of Wyoming, of being the first woman elected chief executive of the state. Mrs. Ross, it is understood, will be inaugurated before Mrs. Ferguson, but friends of the Texas Governor-elect retained for her the honor of being "first" because her candidacy was carried through three bitter campaigns,

## Regains Consciousness For First Time in Two Days

(Cambridge, Mass., Nov. 7.—A bulletin issued shortly after noon by physicians attending Senator Henry Cabot Lodge said that for the first time since he suffered a stroke at noon on Wednesday he was getting short periods of consciousness. He also took nourishment for the first time since he was stricken, the bulletin said. The bulletin was signed by Dr. John H. Cunningham, one of the two physicians caring for Senator Lodge.

Mr. Henry J. Duemeland, Secretary of the company, in an interview stated "The selections of canned products is an art in itself, for it is known that the United States produces more than two hundred different foods in cans. American industry, research and ingenuity has made this country the world's leader in production and consumption of canned corn on the cob as tender and flavorful as though recently picked from the garden. Canned peas from Montana and Wisconsin have all the delicate taste of the fresh product. Canned fruit from California, Michigan, Maryland, Wisconsin, etc. can be secured any day in the year and under their orchard favor retained. A modern method of preparing canned foods have taken the place of the old puncture and solder system because now hygienic tops automatically sealed universally used and government inspectors as well as experts of the industry watch every operation that the public may be served with the best product possible. Canned milk is used in sixty per-

cent of the homes. This is also true of canned salmon and canned corn. Forty five percent of the homes use canned tomatoes and thirty eight percent are users of canned baked beans.

Mr. Duemeland announced that the week of November 8th to 15th will be known as "Canned Goods Week" when the retail grocery trade will make special displays of canned goods produced in the United States.

"I had a running sore on my leg for nine years, tried all kinds of salves, had several doctors treat it—even had it cut to the bone and scraped—nothing did any good. I was told to try Peterson's Ointment; used three boxes and my leg is entirely healed and smooth as my other leg. Thanking you very much for what it has done for me. Yours respectfully, S. H. Crabtree, 3102-A Olive Street, St. Louis, Mo." 25 cents a box.—Adv.
